

08/10/2021

To Whom It May Concern:

This letter is to verify that **Shreyas Gune** was employed with **Gannett** at our **McLean, VA** location from 05/15/2017 to 08/09/2021 in the position of Site Reliability Engineer as a full-time employee.

Roles fulfilled while at Gannett:

- o Site Reliability Engineer
- o Platform Developer
- o Customer Engagement Engineer
- o Edge Reliability Engineer

Responsibilities and Duties performed:

- o Created tools and services to enable product development teams
- o Running large scale applications at scale using GCP, AWS, Scalr and Kubernetes.
- o Built applications and APIs that provide self-service access to platform engineering services and infrastructure
- o Standardized observability and reliability across these applications
- o Test-driven development and deployments for business initiatives
- o Continuously improved automation and operational efficiency
- o Deploying and maintaining CDN configuration and delivery pipelines
- o Improved business-critical applications such as our Content Management System (CMS) and industry-leading media brands like USA Today
- o Interacted with other teams and product owners to leverage our CDN capabilities for the successful delivery of their initiatives
- o Continuously mentored and coached the other engineers on the team
- o Performed detailed and valuable code reviews
- o Identified and implemented changes to our team processes to further improve our success
- o Improved and established best practices around our application and infrastructure observability and monitoring.

If you require additional information, please do not hesitate to contact me at agass@gannett.com or 845-741-5791.

Sincerely,

Angela Gass
